

Installing Microsoft Silverlight to Access eLearning Media & Class Captures @ NYLS (Mac OS)

1

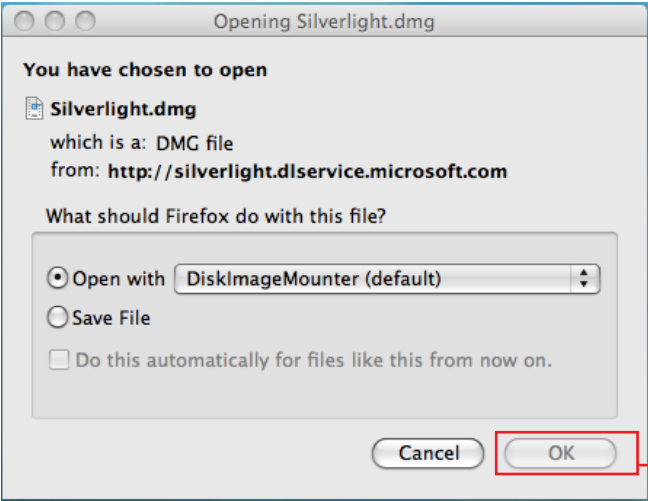

You will find that if your system does not already have Microsoft Silverlight as an installed internet browser plug-in, a prompt will guide you to "Install Microsoft Silverlight" in your browser window when attempting to access your rich media link. Click on the prompt to begin the download.

2

Once the download is complete, double-click the icon in your download tray.

3

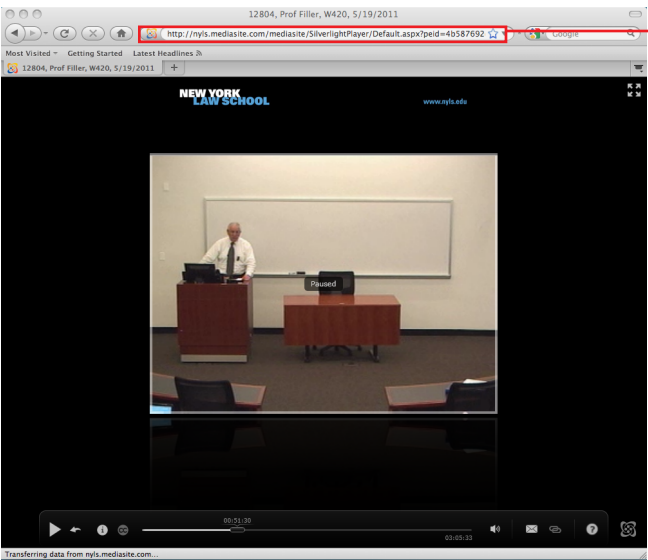

If you are prompted with a choice of how to open the file, Select "DiskImageMounter" and then click the [OK] button.

4

Once installation is complete, quit your internet browser application so that the plug-in will function properly.

5

Launch your internet browser and reload your rich media link. Your plug-in is now functioning properly.
